

## Capability Statement

Founded in 1983, Onyx, Inc., a TDG Company, specializes in innovative planning solutions for Navy installation and facility planning. Our team of planners, architects, designers, and GIS specialists is dedicated to creating strategic approaches that enhance client value and optimize operations. As a dynamic, service-disabled veteran and minority-owned small business, we aim to exceed client expectations and industry standards.

## WHY CHOOSE US

Onyx, Inc specializes in providing architecture and engineering services to federal customers worldwide. Over our 36 years in business, we have offered comprehensive planning, architecture, interior design, landscape architecture, and technology solutions to agencies such as the DOD, DHS, DOT, DOE, DOI, and GSA. Our expertise in environmental consulting and sustainability complements Onyx's extensive suite of architecture and engineering services. We are dedicated to excellence in project management across all scales, consistently meeting and exceeding client expectations.

## FEATURED CLIENTS

- Army Corps of Engineers (USACE)
- Naval Facilities Engineering Command (NAVFAC)
- U.S. Air Force (USAF)
- U.S. Marine Corps (USMC)
- Marine Corps Installation Command (MCICOM)
- U.S. Department of Homeland Security
- U.S. General Services Administration (GSA)

## NAICS CODES

- **541330** Engineering Services
- **541611** Management Consulting
- **561210** Facility Management
- **541310** Architectural Services
- **541618** Other Management Consulting
- **541620** Environmental Consulting
- **562910** Remediation Services
- **541320** Landscape Architecture
- **541360** Geophysical & Mapping Services
- **541370** Surveying & Mapping

## CORE COMPETENCIES

### Infrastructure & Engineering:

- Facility & Property Management
- Construction Management
- Logistics & Operations Support

### Asset Management:

- Capital Investment Plans (CIP)
- DD 1391s
- Asset Evaluations (AE)
- Basic Facility Requirements (BFR)
- Facilities Planning Documents (FPD)
- Space Utilization Studies (SUS)
- Geographic Information System (GIS)
- internet Navy Facilities Asset Data Store (iNFADS)

### Installation Planning:

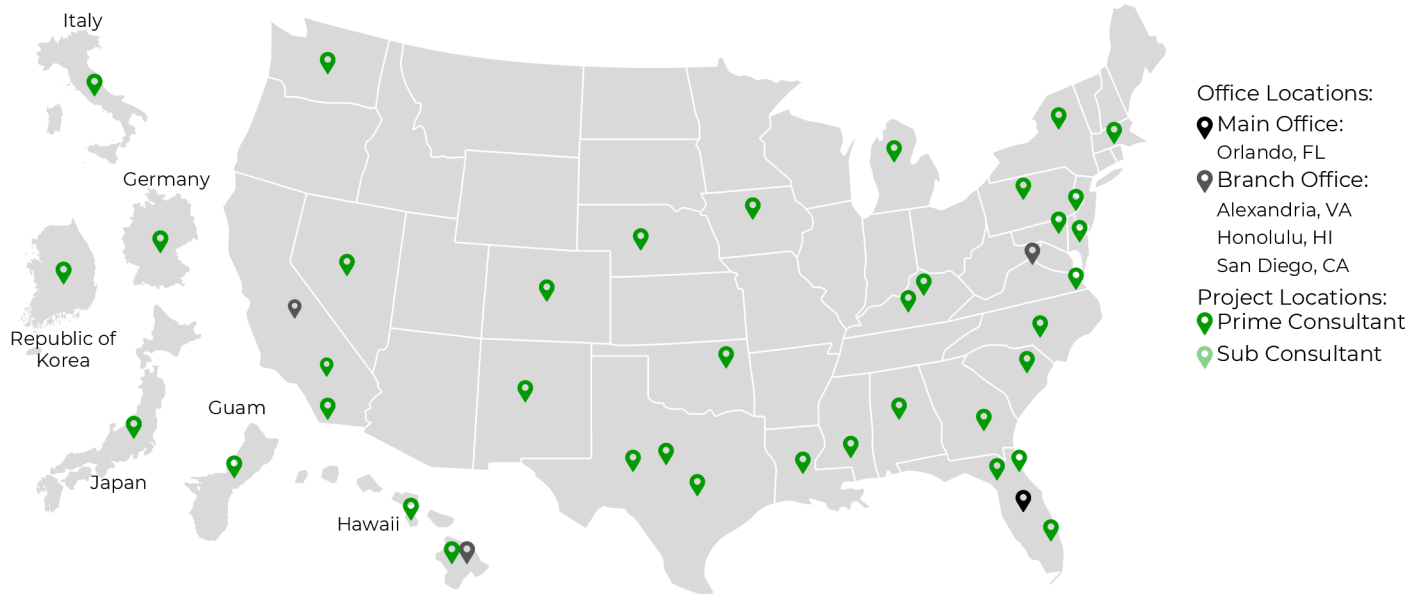

- Installation Development Plans (IDP)
- Area Development Plans (ADP)
- Land Use Planning
- Site Planning
- Conceptual Design
- Design Charrettes
- Campus Planning
- Urban Design
- Stakeholder Outreach
- Architectural Concept Development
- 3D Visualization
- Sustainable Planning

## FEDERAL CERTIFICATIONS

- Service Disabled Veteran Owned Small Business (SDVOSB)
- Woman Owned Small Business (WOSB)
- Economically Disadvantaged Woman-Owned Small Business (EDWOSB)

**ONYX GROUP OFFICE LOCATIONS AND RECENT PROJECT LOCATIONS:**

**ONYX GROUP'S FEATURED PROJECTS:**

**NAVFAC Integrated Product Support Program for Operational/Mission Readiness and Coastal Resiliency Facilities and Infrastructure (Swift River Environmental/Versar JV)**

Over the past four years, TDG has been committed to enhancing the Integrated Project Support (IPS) program's efficiency and efficacy. We achieved this through the development of Standard Operating Procedures (SOP), comprehensive work templates, and extensive internal training tailored exclusively for our Project Managers (PMs). These tools have standardized our processes and empowered our PMs with the knowledge and resources necessary to execute their roles with precision and conformity to industry best practices.

**NAVFAC Environmental Technical Services Contract for NAVFAC SE (CEG-Montrose Environmental Group JV)**

TDG provided program management of all AST/UST projects for this IDIQ Contract, which included providing the necessary personnel, supplies, tools, material, equipment, and transportation necessary for the removal, repair, installation, inspection, and testing of Underground Storage Tanks (USTs) and Aboveground Storage Tanks (ASTs), as well as install monitor wells and perform sampling.

**Naval Support Activity Annapolis/U.S. Naval Academy: Installation Resilience Project Development And Master Plan (Swift River Environmental/Versar JV)**

TDG is proud to have played a crucial role in the Installation Resilience Project Development and Master Plan for the Naval Support Activity Annapolis/U.S. Naval Academy. As a subcontractor in the Swift River/Versar JV, we provided significant program management support. Our efforts were instrumental in the planning, design, and execution of resilience projects set to be undertaken in the 2024-2029 cycle. Our responsibilities included collecting critical data, evaluating information requirements as specified in the Master Installation Resilience Plan (MIRP), and conducting a thorough assessment of installation roadways, traffic circulation, and parking demands.

**IDIQ for A/E Services for Preparation of Navy/Marine Corps Planning & Engineering Services for Work in CONUS-East Coast (AECOM Baker Cardno JV-Prime)**

In May 2020, our team was subcontracted to support the AECOM-BAKER-CARDNO NAVFAC Atlantic Planning JV, headquartered in Arlington, Virginia, following their successful acquisition of a \$95 million firm-fixed-price, indefinite-delivery/indefinite-quantity (IDIQ) architect-engineering contract. This contract requires the provision of comprehensive planning and engineering services for the Navy and Marine Corps, primarily along the U.S. east coast but also extending globally. Under this IDIQ, we are tasked with several crucial projects. At Carderock, we are working on Basic Facility Requirements (BFRs) and an Area Development Plan (ADP). In Bethesda, our focus is on a Transportation Management Plan (TMP). At Kings Bay, we are self-performing an Installation Development Plan (IDP). Additionally, at NMIC, we are engaged in a traffic study and an ADP. Our contributions play a vital role in developing infrastructure, preparing military construction project documentation, estimating costs, and conducting various studies, including feasibility and safety assessments.

**IDIQ for Environmental Planning (Marstel Day - Prime)**

Since summer of 2020 Onyx was contracted to supported Prime Marstel Day with planning services. Under this IDIQ, we are tasked with several crucial projects. At NSF Carderock, we are working on Basic Facility Requirements (BFRs) and an Area Development Plan (ADP). At NSA Bethesda, our focus is on a Transportation Management Plan (TMP). Additionally, at NSF Suitland / NMIC, we are engaged in a traffic study (as a followup to a previously completed TMP) and an ADP. Our contributions play a vital role in developing infrastructure, preparing military construction project documentation, estimating costs, and conducting various studies, including feasibility and safety assessments.
